36 BENEFITS OF HANSTONE

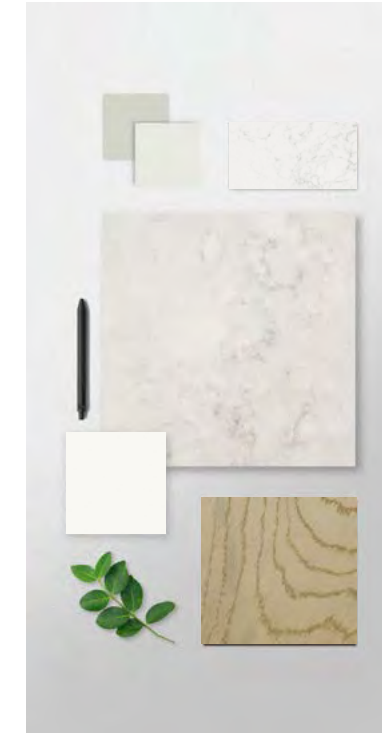

# DESIGNED TO INSPIRE.

There is good design and then there is GREAT design, which has the ability to evoke an emotional response. Our home is a reflection of who we are and is immensely personal. Bathrooms, where we renew ourselves. Kitchens, where we provide nourishment to those whom we cherish the most. We must begin by asking "How do I want to feel in this space?"

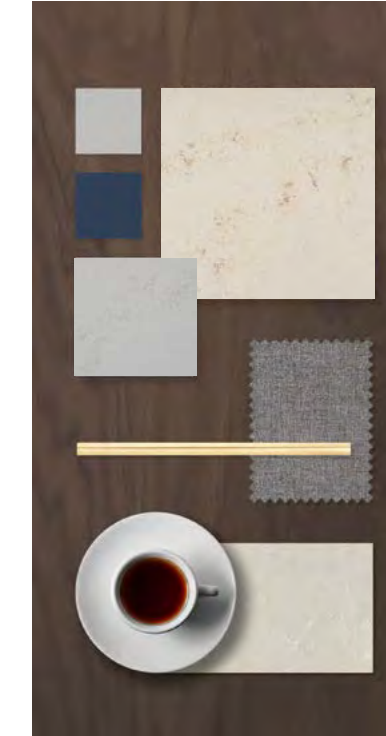

## Calm | Peace | Confident | Fearless

Science lends its hand in helping to translate these emotions into four visual color palettes. We understand that our products are not the focus of your space. Choose your palette and let us guide you in selecting the best quartz design that will blend effortlessly with its surroundings, creating balance and harmony in your space.

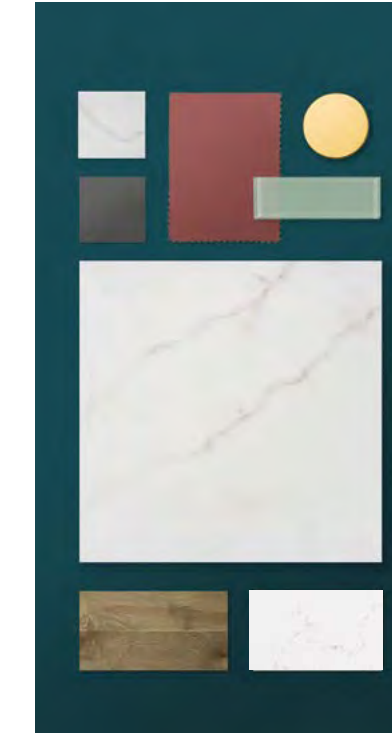

### PEACE

A reflection of the desire to simplify one's life, Peace explores light, tinted neutrals. Its monochromatic palette soothes the mind with soft hues and natural finishes.

### CALM

Seeking to reconnect to the earth, Calm is the embodiment of warmth. Golden hues and wood finishes seek to further reinforce this notion, creating harmony with the environment.

### FEARLESS

Recalling memories of simpler times, Fearless explores the freedom of youth. Striking, colorful hues evoke memories of one's childhood, resulting in creative and expressive spaces packed with personality.

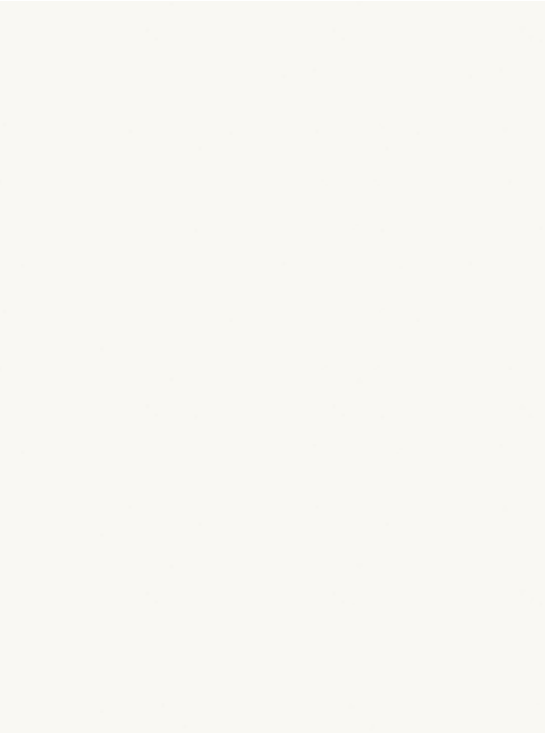

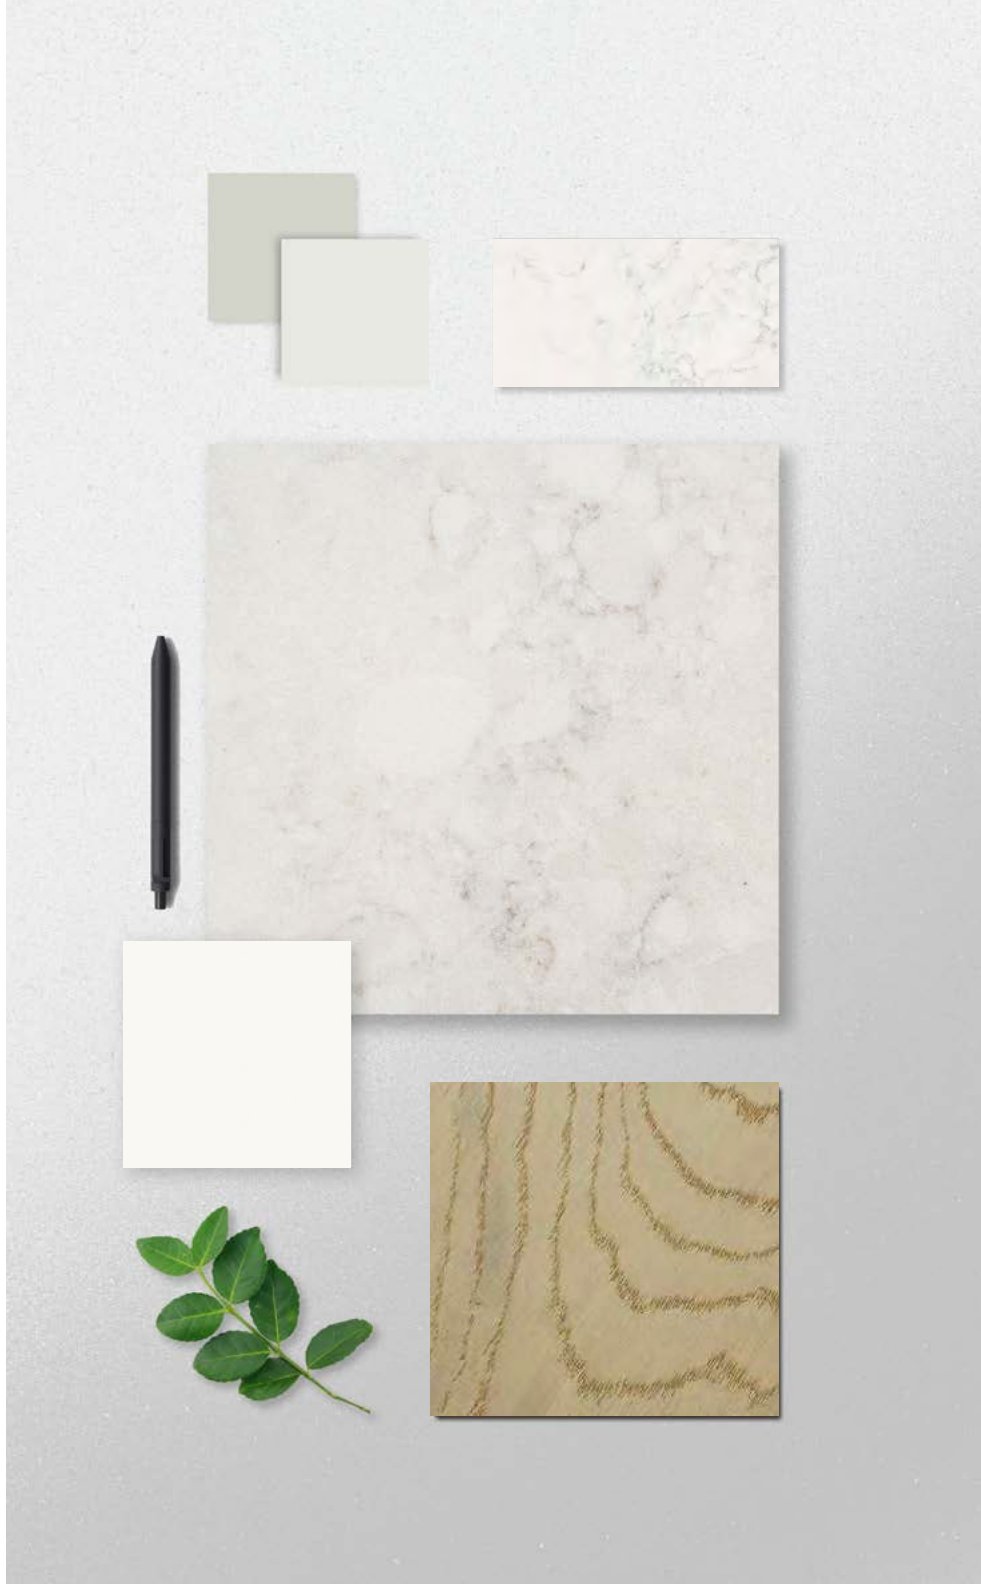

### CONFIDENT

An atmospheric mood, Confident takes shape with rich, deep values reminiscent of night. Tailored details paired with natural elements culminate in the ultimate expression of understated elegance.
